INTERESTS

I am interested in graph theory and would like to work on topics related to graph algorithms and structural graph theory. In addition, I am also keen on topics related to discrete optimization.

EDUCATION

University of Waterloo   Sep 2017 - Present
Currently in fourth year

· Double Major in Combinatorics & Optimization and Computer Science
· Minor in Pure Mathematics
· Term Dean's Honours List

Relevant Courses

· Graduate: graph-theoretic algorithms, algorithms for graph minors
· Undergraduate: algebraic graph theory, network flow theory, coding theory, introduction to graph theory, introduction to optimization, algorithms

Relevant Projects

· **Bounded queue-number in planar graphs**

I explored a recent proof by Dujmović et al [1] for a 20-year old conjectjure on whether the queue-number of planar graphs is bounded. I also wrote lecture notes and made a lecture video on the topic.

· **Deciding tangles with weighted vertex sets**

I wrote a report on Elbracht et al.'s fractional solution [2] to an open problem about finding a vertex subset that characterizes a tangle by a majority vote. In addition, I also explored Oum and Seymour's paper [3] on certifying large branch-width in polynomial time with tangle-kits.

PUBLICATIONS

· **UBCIS: Ultimate Benchmark for Container Image Scanning**,
with Shay Berkovich and Glenn Wurster
Published in 13th USENIX Workshop on Cyber Security Experimentation and Test (CSET 20).
https://www.usenix.org/conference/cset20/presentation/berkovich

· **bioSyntax: Syntax Highlighting For Computational Biology**,
with A. Babaian, et al.
Published in BMC Bioinformatics 19, 303 (2018).

RESEARCH EXPERIENCE

University of Waterloo - Symbolic Computation Group   May 2020 - present
Undergraduate Research Assisstant
Supervised by Armin Jamshidpey   *Waterloo, Canada*

- Investigate new efficient methods of finding normal bases in $\mathbb{F}_{p^n}$ and revisited various topics in abstract algebra and Galois theory
- Researched different methods to find Smith Normal Form over $\mathbb{Z}_{p^2}$ efficiently, such as experimenting with probabilistic algorithms and utilizing J-ideal

BlackBerry - Security Research Group
Janurary 2020 - April 2020
Security Research Intern
Supervised by Shay Berkovich and Glenn Wurster — *Waterloo, Canada*

- Researched and designed a universal benchmark to quantitatively measure the effectiveness and accuracy of container image scanners
- Analyzed techniques of image inspection and vulnerability scanning through open source technologies
- Designed a universal import framework for Anchore Engine to extend our scanning capabilities
- Researched on utilizing machine learning for fuzzing algorithmic complexity vulnerabilities (ACV) by reading multiple security-related journals and conference papers
- Presented to the security research group on current developments of ML-based fuzzing and fuzzing techniques for ACVs, along with potential problems, experiments, and optimizations

PROFESSIONAL EXPERIENCE

GTS
Sep 2020 - Dec 2020
Software Engineering Intern — *New York, US*

- Worked on high-performance C++ and Python code for the core trading engine (Confidential)

Zenefits
May 2019 - Aug 2019
Software Engineering Intern — *Vancouver, Canada*

- Developed new permission services in Python to guard against unauthorized review editing
- Designed a sequeitial document update service using a distributed messsage queue system

Horizn
May 2018 - Aug 2018
Software Developer Intern — *Toronto, Canada*

- Wrote automation scripts in Python to scrape data from files and database into JSON files
- Learned foundational object-oriented programming concepts, such as factory and observer pattern

AWARDS AND SCHOLARSHIPS

Frank Lun Scholarship for Excellence
Dec 2020

- Based on academic performance and leadership abilities

Honourable Mention in Canadian Computing Competition Hong Kong
Mar 2017

- Organized by the University of Waterloo and the University of Hong Kong

TECHNICAL SKILLS

Programming	Python, C++, SAGE, Scheme
Tools	Git, C++ tools (i.e. GCC, GDB, Valgrind), Docker, Linux, Jupyter
